

TECHNOLOGY

TO DELIVER EDUCATION GLOBALLY

Delivering significant value to businesses through innovative solutions to support enhanced E-Learning services

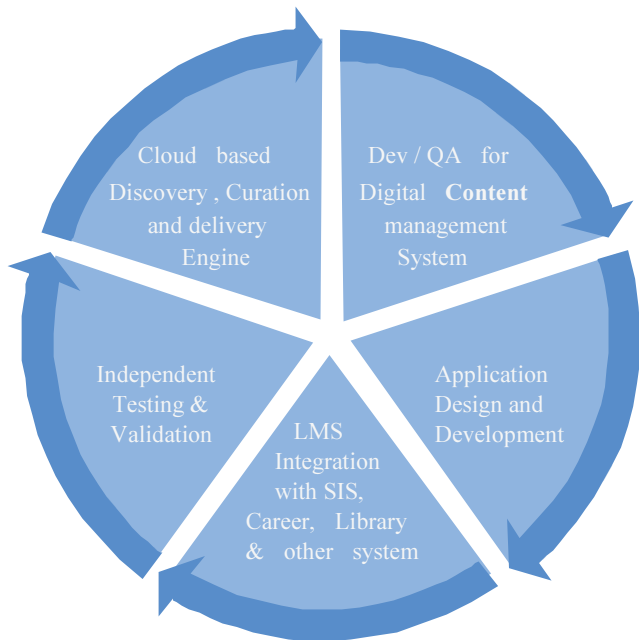

E-Learning Services: Overview

The e-learning industry continues to evolve at very fast pace Due to increasing convergence with the Information and Technology (IT) industry. Major players in the typical E-learning arenas are facing massive challenges to respond to significant new trends like **MOOCs** and **cloud** based learning. Last year, **Mobile Learning** was among the hottest trends for corporate training .To address this, businesses are constantly driven by the need for innovating new products and services to attain growth and profitability.

Techizen's E-Learning Service Offerings

Offerings

Techizen has over 14 years of experience in e-Learning domain. Our leadership team has worked with all major e- Learning companies. We offer a host of services – from concept to deployment – to help businesses reduce costs, increase functionality and accelerate time-to-market. These services enable customers to efficiently meet the challenges of designing and deploying next-generation systems.

Application Design and Development

Our team has extensive experience in following platforms:

Technologies

- Java/J2EE
- .Net
- LAMP
- Open Source Softwares
- ROR, SOA

LMS Connectivity

Setting up and integrating your LMS (learning Management System) with other LMS is a challenging task. The time needed to setup a seamless collaborative connectivity among different LMS can be long and the process is error prone.

A high turn-around time is simply unacceptable in today's fast paced market. Fortunately, there are tool/technologies available which, once combined with best practices, yields much reduced integration times. Techizen has experience in following LMS connectivity to ensure optimal usage and fastest turnaround time for any setup:

1. MOODLE
2. BLACKBOARD.
3. SAKAI.
4. ANGEL.
5. CANVAS.

How Techizen can help you

At Techizen, we have extensive experience in building best tools to reduce the turn-around time for e-learning companies. We strongly believe each product has its own unique challenges which must be dealt with differently. There is no silver bullet that can provide a solution to all problems. With our formidable experience, we are sufficiently equipped to design the right solution for meeting your LMS requirements and facilitating it with best processes and practices.

Power Your LMS: Third Party Apps

Techizen has incumbent expertise in resources and technology to add real power to LMS by integrating it with popular third party applications to give your users rich features with performance, security and system configuration.

Techizen has extensive experience with following Apps

- LAMS
- EVERNOTE-
- KALTURA -
- GOOGLE DOCS
- INSIGHT
- DAA
- WEBLINK

CLIENTS

Techizen has provided various type of services ranging from Product development to QA testing and content testing to all major E-Learning companies like :

- BLACKBOARD
- ROCHETTA STONE
- CENANGE
- 2U Inc.
- TRIUMPH LEARNING.
- EPSILEN
- WEBCT (now part of BB)
- WIMBA Inc.

Cloud and Mobility

Today, Cloud and Mobility are essential elements for success of any e-Learning system. We help our customers with following services to stay them updated with latest trends in technology. Some of our services in this area are :

- Deployment of your LMS to cloud
- Migration of existing LMS to Cloud.
- Mobility to LMS thru Mobile App development.
- APP development on Android / IOS platform

Professional Services

Techizen offers an extensive range of professional services that aid in the following tasks :

- Installation.
- Provisioning.
- Customization.
- System Integration.
- Data Migration
- Data Validation
- Support of software products in customer environments.
- Proof-of-concept and pilot implementations
- Audio / Video content testing
- Search engine optimization

Quality Assurance Services

We help improve product quality, optimize performance, shorten time-to-market and significantly reduce capital and operational expenditures. We transform the way organizations do test management and provisioning. Our self-service model enables managing & accessing tests from anywhere in the world.

Our streamlined, efficient and cost-effective solution includes an end-to-end device testing framework and software testing methodology, tools and processes; and a software testing service with leading device manufacturers.

Techizen's Test team had extensive expertise in Testing of Products ranging from functional testing , Web services, security testing and other testing services.

Focused areas of our testing activities are:

a. Manual Testing

We carry out Functional Testing, System Level Testing, GUI Testing, Scripting and Environment Testing for all type web applications.

We create Test suites equipped with small scripts to ease the Manual Testing and hence eradicate the manual effort and possibility of Test errors for Repeatable cycles.

b. Test Automation:

Techizen specializes in providing Testing Services to product development companies, IT services firms and existing web portal.

Our testing, with an integrated end-to-end device and service provisioning, delivers reliability and quality through automation.
